

FRIENDS OF MINERALOGY - COLORADO CHAPTER

Newsletter, May, 1979
Editor: Dub Crook

Vol. 2, No. ^{3.}~~2~~

Chapter News

The major thrust of the chapter during the last month has been the preparation of the Mineralogical Record's second issue on Colorado. To date, eleven articles have been submitted for the publication. These include such topics as the Sweet Home Mine, museum cavity collecting, amazonite mineralogy, Table Mountain, Mt. Antero, and an entire "Mineralogical Notes" section which includes several new mineral occurrences in Colorado. The articles have already filled all the available space for the issue and it promises to be one of the best Mineralogical Records to date. The executive board wishes to thank all those who have thus far donated articles and or their time to this project.

The program at the last meeting was given by Richard Kosnar on the Sweet Home Mine. All of us present were introduced to the extensive problems associated with collecting outstanding rhodochrosite specimens from this classic locality.

The next meeting will be on Thursday, May 10 at the Denver Museum of Natural History. The meeting will be held at the regularly scheduled time of 7:30 PM and will be preceded by a board of directors meeting at 6:30 PM. The program will be presented by Marsha Taylor of Mobil Energy Minerals on zeolite mineralogy and most specifically, the Table Mountain locality.

There are still some people who have not yet paid their 1979 dues. Checks should be made out to "Friends of Mineralogy" for the amount of \$10 and can be given to Carolyn Jones at the meeting.
